

### **Master Template for Wicks (30 count)**

Make copies of this as needed. Use the copy to cut wicks from your filter paper. Place it over 1-3 circles of filter paper and cut the wicks. Be very careful to separate the template pieces from the filter paper wicks and to separate the wicks from one another if you used multiple filter papers.

## Master Template for Silver Nitrate and Sample Limits

Make copies of this as needed. Lay your filter paper circle over this template and mark the center, silver nitrate, and sample limit dots (only the bold dots, not the circular lines) with a pencil (don't use ink).
